

UPPALA SAI ANJANI

6303747349 | Hyderabad, 500074 | [GitHub](#) | saianjani.uppala2003@gmail.com | [LinkedIn](#)

Motivated and detail-oriented engineering graduate with strong analytical and problem-solving skills. Eager to apply academic knowledge to real-world challenges and contribute to innovative projects while continuing to learn and grow professionally.

SOFTWARE SKILLS

- **Programming Languages** : Python, C,C++ , Java(basics)
- **Technologies & Tools**: Power BI, Tableau, Open WebUI, Azure Cloud, OpenCV, Machine Learning, Artificial Intelligence (AI), Generative AI, Computer Vision, Backend Integrations, Automation Workflows, Data Visualization, MySQL, HTML, CSS, Data Structures & Algorithms (DSA), MS Office, Ubuntu.

PROFESSIONAL EXPERIENCE

V Sigma IT Labs, Hyderabad

[February 2025 - Present]

Analyst

[November 2025 - Present]

- Develop and test Python-based automation workflows for ticketing and operational processes.
- Build n8n flows for ticket resolution, reporting, and notifications. Manage and resolve client tickets.
- Apply Generative AI to optimize workflows and automate repetitive tasks.
- Collaborate with cross-functional teams to deploy AI modules and automation.

Analyst-Intern

[February 2025 - November 2025]

- Worked on **video analytics and computer vision** using **OpenCV, YOLO, and deep learning models** for object detection and tracking.
- Developed **real-time CV pipelines** for video stream analysis and automated event detection.
- Built **Power BI dashboards** to visualize model outputs and system performance.
- Assisted in integrating ML models with backend systems and APIs.

EDUCATION

Bhoj Reddy Engineering College for Women, Saidabad, Hyderabad
Bachelor of Technology in Information Technology

[2021-2025]
CGPA: 8.4

PROJECTS

- **Chat2Code: Apps Made Easy With AI!** *MAJOR PROJECT | [Published in IJRASET. 2025](#)*
 - **Chat2Code** is an AI-based web tool that converts natural language prompts into multi-language code, enabling users to quickly generate functional webpages and applications without manual coding.
 - **Impact:** Reduces development time, helps beginners and non-developers create functional applications, and supports multiple programming languages for versatile use.
- **Harnessing machine learning for predictive diagnosis of Parkinson's disease** *MINI PROJECT | [Published in AIP Proceedings. 2025](#)*
 - Developed an SVM-based machine learning model in Python to predict Parkinson's disease, using Scikit-learn for data preprocessing, training, and evaluation.
 - **Visualized data patterns and model predictions** using Python libraries like Matplotlib and Seaborn for better interpretability.
